ABOUT US

Founded in the year 1983, Usha Lubes Pvt. Ltd. is an ISO 9001:2015 certified company, that has been engaged in the manufacturing and marketing of products associated with the Wire Rope Industry, since inception.

Usha Lubes Pvt. Ltd. is head-quartered at Kolkata (West Bengal), located in the Eastern part of India. The company's manufacturing & laboratory facilities are located in Jamshedpur (Jharkhand). We also have a presence in New Delhi and Pune in order to serve our customers in the Northern and Western parts of India, respectively. For the company's over-seas operations, Usha Lubes Pvt. Ltd. operates a subsidiary company - Usha Lubes (Thailand) Ltd. - out of its stock point-cum-office in Bangkok.

At the time of inception, Usha Lubes Pvt. Ltd. was only focused on manufacturing Wire Rope Lubricants. The company has gradually expanded its product basket to include other products such as Wire-Rope Cold Socketing Compound (WIRELOCK®), Wire Drawing Soaps/ Lubricants (CONDAT SA), Rust Preventive Oils, etc., related to the Wire Rope Industry.

Usha Lubes Pvt. Ltd. has formal tie-ups with CONDAT SA (France) and M/S Millfield Enterprises (Manufacturing) Ltd. (United Kingdom) to act as their channel partner for certain markets and products.

WIRE ROPE LUBRICANTS

Usha Lubes Pvt. Ltd. has been manufacturing wire-rope lubricants for over 30 years. Our company manufactures two types of wire-rope lubricants : **Wax-based** & **Bitumen-based** Lubricants.

Our lubricants are used in the manufacturing/servicing of the wire-ropes meant for a wide variety of industries. Special colored lubricants used for strand identification in wire-ropes, are manufactured against special orders.

All lubricants manufactured by our company conform to specifications laid down by Bureau of Indian Standards (BIS). Our most popular wire-rope lubricant products (USHA WRL - 8 & USHA WRL - 55) meet and exceed both the Indian as well as international quality specifications laid down for such lubricants.

An overview of various grades of rope lubricants

Grade	Type	Characteristics	Application	Uses
USHA W-1	Brownish Yellow	Good lubricity and anti-rust properties	Engineering ropes	Manufacturing & Servicing
USHA WRL-2	Black	Heavy bodied, adhesive type black bituminous	Open gears, Fishing and Crane ropes	Servicing
USHA WRL-8	Black	Good underground performance in wet and dusty environments	Mining ropes	Manufacturing & Servicing
USHA WRL-55	Brownish Yellow	Excellent lubricity, tackiness and rust prevention over a wide temperature range	Engineering, Crane and Elevator ropes	Manufacturing & Servicing
USHA WRL-58	Black	Good adhesion and coat with very good rust prevention	Fishing ropes	Manufacturing
USHA WRL-60	Brownish Yellow	Good lubricity and excellent rust prevention	Engineering ropes	Servicing
Special purpose lubricants				
USHA GL Grades	Colored	Color as per customer specification	Strand marking during rope manufacturing	Strand identification

RUST PREVENTIVE OIL

Usha Lubes manufactures Rust Preventive Oil for various applications. All products are tailor-made as per the customer's requirements.

Please contact a member of our team for detailed information about our range of Rust Preventive Oils.

WIRE ROPE SOCKETING COMPOUND (MILLFIELD GROUP, UK) WIRELOCK

WIRELOCK® is a Polyester Resin based Compound developed for socketing wire-ropes. This unique product unlocks a number of benefits for its users.

A Socket formed using WIRELOCK® is extremely durable and have been known to outlast the wire-rope's usable life. The process of applying WIRELOCK® releases almost no heat, making it safe for our use in hazardous environments such as inside underground mines. Apart from this, WIRELOCK® kits come in pre-measured quantities ensuring no time is lost measuring quantities to be mixed, as well as leaving no waste material.

WIRELOCK® is used around the world and is approved by a number of internationally recognised organizations as the ones mentioned below :

WIRE DRAWING SOAPS/LUBRICANTS (CONDAT SA, FRANCE) CONDAT

Condat products are best suited for wires in Stainless Steel, High Carbon Steel and such wires being drawn for mechanical applications.

Our product range broadly covers - Wire-drawing soaps / Dry powder lubricants, Non-reactive surface coatings, Oils and greases, Soluble lubricants and pastes, Rust Protection products, Degreasers, etc.

Using products from the Condat's range ensures that you have the best quality products that protect your dies, as well as ensuring the best possible performances during the process of wire drawing.

FIRE RESISTANT HYDRAULIC FLUID (CONDAT SA, FRANCE) CONDAT

Fire Resistant Hydraulic Fluids help machines/equipment which use hydraulically operated parts, run safely and efficiently in hazardous environments.

Using FRHF in hydraulic equipment greatly reduces the risk of fire in the event of a fluid leak, thereby protecting valuable equipment, surrounding installations and operators as well.

Our products are designed to ensure a long service life and excellent protection for your equipment.
